

JOB VACANCY

The University Hospital Essen offers first class medical services in the Ruhr metropolis. Every year, 225.000 patients are treated in 26 clinics, 23 institutes and specialized centers. The over 6.000 employees offer medical care with state-of-the art diagnostics and therapies, which meet highest international standards. Patient care is connected with basic and translational research at an internationally competitive level.

The **Institute of Immunology** is currently seeking a

Postdoc (m/f/d)

(Pay grade E13 TV-L / 100% - temporary employment)

The Employment is starting as soon as possible and is initially for a limited period. An extension might be possible according to the maximum employment duration as given by laws regarding scientific fixed-term contracts (Wissenschaftszeitvertragsgesetz). On basis of the Wissenschaftszeitvertragsgesetz or the Teilzeit- und Befristungsgesetz the duration of the contract depends on the personal requirements. The pay grade classification depends on the personal and collective legal requirements. The position offers the opportunity for Habilitation (Qualification for a University lecturing degree).

The Institute of Immunology is led by Prof. Dr. med. Karl Sebastian Lang since 2011 and performs cutting-edge research in the fields of viral immunology, immunological cancer therapy and auto-immunity. Profoundly funded by multiple DFG grants and participating in joint projects such as SFB-, Transregio- and Graduate School-programs, the Institute cooperates with other excellent research institutions worldwide, such as the Princess Margaret Cancer Center of the University of Toronto, Canada, the National Institutes of Health (NIH), Maryland, United States, the Weizmann Institute of Science, Rehovot, Israel, the Wuhan University School of Medicine, Wuhan, China and the University of Zürich, Switzerland. The research environment is international with English as a working language and work is published in well-known, peer-reviewed journals.

Description of duties:

- Generating your own research ideas and develop them into successful, high level research projects
- Raising competitive third-party funding and establish your own research group
- Interacting scientifically and methodically with other researchers at the Institute and the University and help forming the research environment

Your profile:

- University degree (master or diploma) in (Bio-)medical Sciences or a closely related study subject
- PhD in (Bio-)medical Sciences or a closely related study subject with excellent results
- A substantial interest in Immunology as well as pro-found background knowledge are required
- The candidate should be highly self-motivated, disciplined, a good communicator and team-oriented

The University Hospital Essen is an equal opportunity employer. Female scientists are particularly encouraged to apply.

The participation in secondary employment depends on the „Hochschulnebenbeteiligungsverordnung“ of North-Rhine Westphalia.

Disabled applicants will be preferentially considered in case of equivalent qualification.

The position is also available as part-time employment.
